

A herbal insecticidal composition

Salient features of the Technology:

- Being a herbal composition, it is easily biodegradable and is environment friendly.
- This herbal composition was found comprehensively effective against the five mosquito vector species of three genera.
- The observed LC50 value for the herbal composition was less than 20ppm, so it could be prospective biorational alternative molecule for organic insecticide.
- This technology has been developed by NIMR, Delhi (an ICMR institute).
- An Indian patent has been granted.
